Summary

During my 5 years of engineering experience, I worked in several firms in different roles. But since my childhood, I have had a big passion for information technologies. With the web design course which I attended in 2017-2018 and realized my special interest in web development, especially in the front-end development area. Thus, I took online courses that include HTML5, CSS3, JavaScript, JQuery, Bootstrap4, WordPress. Since then, I am enhancing myself by having online courses, creating my own blog (www.gokselozkazanc.com), making practices, reading, and learning continuously. Therefore, I am looking for an opportunity to gain experience and to go on my career in the front-end development field.

Experience
